

## ***Environmental Policy***

For the purposes of this Environmental Management Plan, the “Club” consists of its Management Committee, its employees and members.

In September 2024, the Management Committee of the Cockburn Power Boat Club endorsed the Club’s Environmental Policy.

The club will endeavour to implement the policy through the strategies and actions identified in the Environment Management Plan.

Accordingly, the Club’s Management Committee, administration and membership commit to:

- Make the environment a key consideration in decision-making;
- Meet or exceed the requirements of all relevant legislation, permits and legal obligations;
- Regular monitoring of the Club’s environmental performance;
- Adherence to club rules and procedures as they relate to the environment;
- Minimise environmental harm, pollution and degradation from the activities of the club where practically possible;
- Ensure appropriate and timely interventions and emergency response procedures and equipment/materials are in place in the event of an environmental incident;
- Promote a culture of protecting the environment and biodiversity of Cockburn Sound and adjacent waterways for our membership and
- Ensure any contractors undertake works onsite in compliance with the Environmental Management Plan.
